SUMMARY

Software engineer with a **Bachelor's degree in Informatics Engineering (Software Engineering)** from **Damascus University**, and **4+ years** of experience building web applications, **REST APIs** and custom **ERP** modules. I work with **Laravel** and **Vue.js** professionally, and build modern projects with **Next.js**, **TypeScript** and **FastAPI**. I design the database, build the API and the admin interface, and turn business rules — production, inventory, purchasing, sales and HR — into working systems.

All my projects run live in the browser: [open my portfolio and try them](#).

TECHNICAL SKILLS

Back-end	Laravel · PHP · RESTful APIs · FastAPI · Python · SQLAlchemy
Front-end	Next.js · React · TypeScript · Vue.js · Blade · JavaScript · HTML / CSS · Tailwind CSS
Databases	MySQL · SQLite · Prisma · Query optimisation · Reporting
Tools	Git / GitHub · Docker · Agile · Figma
Languages	Arabic — native · English — good

WORK EXPERIENCE

Full-Stack Developer — ERP Systems

Aug 2023 – Present

CamelCase Company

- Built and maintained a large **ERP system** (10+ modules) end to end: database design, back-end logic, **REST APIs** and user interfaces.
- Integrated modules with each other (products, stock, purchasing, sales, HR) and developed analytical reports covering inventory, sales, purchases, expenses and purchase orders.
- Designed the admin-dashboard screens for several modules and worked with the team to deliver them.

Back-End Developer — Freelance

May 2023 – Jul 2023

- Built custom web solutions and **admin dashboards** for clients.

Back-End Developer — Startup Company

Oct 2022 – Apr 2023

- Developed web applications and optimised their **databases**.

PERSONAL PROJECTS

MFP Manufacturing — BOM, production orders, shop floor with serial and batch traceability, QC, costing, barcode labels.

Next.js · Prisma [Dashboard](#) | [GitHub](#)

Restaurant OS — QR menu, live kitchen display, ingredient inventory. **Next.js · TypeScript** [Website](#) | [Dashboard](#) |

[GitHub](#)

Wasla (وصلة) Marketplace — local shop, buy-from-anywhere, food and errands, full admin panel — Arabic / RTL. **Next.js ·**

FastAPI [Website](#) | [Dashboard](#) | [GitHub](#)

Gamified Learning — levels, quizzes, assignments and rewards for kids — Arabic / RTL. **Next.js** [Website](#) | [GitHub](#)

Masar Logistics — waybills, dispatch board, live tracking, invoices, driver app (APK) — AR / EN. [Next.js](#) · [FastAPI](#) · [Capacitor](#)
[Website](#) | [Dashboard](#) | [GitHub](#)

Skincare Store (LumeCare) — beauty storefront with catalogue, routines and cart. [Next.js](#) [Website](#) | [GitHub](#)

Dental Clinic — appointments, interactive odontogram, treatment plans, billing. [Next.js](#) [Website](#) | [Dashboard](#) | [GitHub](#)

Education Platform — courses, quizzes, puzzles and role-based dashboards. [Next.js](#) [Website](#) | [Dashboard](#)

Pharmacy Manager — batch and expiry stock, point of sale, suppliers. [Next.js](#) [Dashboard](#)

Booking SaaS — multi-tenant bookings and subscription plans. [Next.js](#) [Website](#) | [Dashboard](#)

Smart Flow — operations platform with admin dashboard, products and categories. [Laravel](#) · [Vue 3](#) [GitHub](#)

Mihrab (Mosque) — mosque management and community app. [Next.js](#) [GitHub](#)

Atlas Dev website — bilingual company website and product showcase. [HTML](#) · [CSS](#) [Website](#) | [GitHub](#)

ERP MODULES DELIVERED (CAMELCASE)

- **Manufacturing System (MFP)** — production orders, raw-material consumption, labour-hour tracking, technical and assembly data-entry screens, label printing, stock requests and movements on the production line.
- **Product Catalog (Catalog)** — reworked product storage across modules with automatic code generation; map page to add products to stores and set min / max quantities; screen for fast price review and updates.
- **LC Shipments Management (LC)** — supplier shipments by Incoterms, containers linked to purchase orders, shipment tracking, receipts, expenses and currency conversion.
- **Sales Representatives Management (SRM)** — commission plans by sales or product, automatic commission calculation, representative performance reports.
- **Stock Counting (STC)** — periodic warehouse counts, quantity monitoring, results linked to financial reports and discrepancy analysis.
- **Leave & Attendance (LMS)** — leave types, leave encashment, delay registration, extensions and time adjustments per company policy.
- **Offers & Promotions (OAP)** — discounts by quantity or product, multiple offer types, campaign linkage and sales-impact reports.
- **Customer Relationship Management (CRM)** — annual client targets and client master data for precise performance tracking.
- **Observation / Violation Report (OVR)** — violation notes with witness statements and evidence attachments, status and action tracking.
- **Purchases Evaluation (Peval)** — supplier scoring on quality, delivery time, price and contract compliance to support purchasing decisions.

EARLIER PERSONAL PROJECTS (LARAVEL & VUE.JS)

E-commerce Store — online shop with dashboard. [Laravel](#) · [Blade](#) [GitHub](#)

Charities Management — operations for beneficiaries and donors. [Laravel](#) [GitHub](#)

Mosque & Volunteer Management — two management systems. [Laravel](#) [Mosque](#) | [Volunteers](#)

Social Media API — back-end API for a social groups app. [Laravel](#) [GitHub](#)

Recipes App — API and front-end. [Laravel](#) · [Vue.js](#) [Back-end](#) | [Front-end](#)

Vue.js front-ends — e-commerce, school, blog, fruit store, company landing page. [Vue.js](#) · [Axios](#) [E-commerce](#) | [School](#) | [Blog](#) | [Fruit store](#)

The Oxford Project — online exam platform with student monitoring (full-stack).

EDUCATION

Bachelor's Degree in Informatics Engineering

2018 – 2025

Software Engineering & Information Systems — Damascus University, Faculty of Information Technology Engineering

- **Graduated** with grade Good (72.96 %), academic year 2024 – 2025.
- Graduation certificate: [view the certificate](#)

COURSES

- **Laravel** Advanced Training — self-paced learning and applied practice.
- **Vue.js** Fundamentals — self-learned through educational channels and applied in projects.
